Inspection

Type: ROUTINE INSPECTION

Date: SEP-27-2006

2.40 (b) (3)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

(b) Each dealer or exhibitor shall establish and maintain programs of adequate veterinary care that include:

(3) Daily observation of all animals to assess their health and well-being; Provided, however, That daily observation of animals may be accomplished by someone other than the attending veterinarian; and Provided, further, That a mechanism of direct and frequent communication is required so that timely and accurate information on problems of animal health, behavior, and well-being is conveyed to the attending veterinarian;

--The exhibitor does not have a mechanism of direct and frequent communication established with the attending veterinarian for the kangaroos. Timely and accurate information on the health problem which led to the euthanasia of the adult female kangaroo on 7-22-06 has still not been conveyed to the kangaroo's attending veterinarian. The exhibitor did not ensure that there was communication or consultation between the veterinarian who hospitalized the kangaroo for a week and the attending veterinarian. None occurred. The attending veterinarian has still not been provided the bloodwork results or the necropsy report. Timely and accurate information is necessary, so that the kangaroo's attending veterinarian may ensure that the remaining kangaroos receive adequate care including any possible measures to prevent a reoccurrence. The exhibitor shall ensure that a mechanism of direct and frequent communication is in place so that timely and accurate information on problems of animal health, behavior, and well-being is conveyed to the appropriate attending veterinarian.

To be corrected by 10-2-06.
