Subject: NUVAS euthanasia

Dear Mr. Gettling:

Thank you for mailing records responsive to UARC's GRAMA request. I have received and reviewed them.

UARC requested *any* "written agency or department policies or procedures regarding the euthanasia of animals in your care." The only responsive material to this portion of UARC's request appears to be an SOP for the operation of a carbon monoxide gas chamber. Is euthanasia via a gas chamber the only method of euthanasia employed on animals at North Utah Valley Animal Shelter (NUVAS)? Thank you.

Jeremy Beckham, MPA, MPH, CPH
